Terms and Conditions
<p>PLEASE ENSURE ALL THE DETAILS ON THIS FORM ARE CORRECT AS INVOICES WILL BE ISSUED BASED ON THESE. PLEASE NOTE THIS IS NOT AN INVOICE.</p> <p>By accepting this Order Form you are agreeing to the terms and conditions ("Terms") at https://risk.lexisnexis.com/corporate/dataserviceterms. This Order Form and the Terms prevail over any terms and conditions in a customer purchase order, whether dated or submitted before or after the date of this Order Form.</p> <p>Payment Term: 30 days, Billing Frequency: One Time</p>

Terms. Parts A (Core Terms), B (Data Terms) and F (Generative AI Product Terms) apply to this Order Form. ICIS may refuse any order. Defined terms in this Order Form have the meanings given to them in the Terms. In the event of a conflict between this Order Form and the Terms, this Order Form shall prevail. References in the Terms to “LNRS” are references to the ICIS legal entity set out at the end of this Order Form.

User Licensing and Use Case. Schedule A specifies the number of Authorized Users. Where Schedule A states that an organizational license applies, the number of Authorized Users is unlimited (subject to ICIS reasonable system limitations from time to time). Unless otherwise stated on this Order Form, Authorized Users are individual, natural persons based at the locations identified on this Order Form. Authorized Users may (a) access and use the Product and/or Licensed Content in accordance with Part B of the Terms and this Order Form in order to undertake the relevant Use Case activities, as set out in Schedule A and (b) may create and share Derived Data internally on an incidental and non-systematic basis and solely as required in order to undertake the relevant Use Case activities. Nothing in this section permits external sharing of Licensed Content. Fair usage limits apply.

Permitted Applications. Where Customer is permitted under this Agreement to place Licensed Content in an application (a “Permitted Application”), Customer shall maintain a written agreement with each provider of a Permitted Application (each a “Provider”) which provides that all information, documents, data, and prompts loaded into the Permitted Application (including Licensed Content) are treated as Customer’s confidential information and are used solely for the benefit of Customer, and are not disclosed to any third party or used, retained, or incorporated by Provider in any other way, including to undertake or create analytics or insights for any purposes other than the provision of application or services to Customer, or to train or modify an artificial intelligence model.

Data as a Service Right. This paragraph applies only where Schedule A includes the DaaS right. If Schedule A does not include the DaaS right, the rights in this paragraph do not apply. Where Schedule A includes the DaaS right, Customer may (a) receive Licensed Content via an API or other delivery method set out on this Order Form, (b) scrape Licensed Content from the Product, (c) download Licensed Content using download functionality within the Product, and/or (d) download Licensed Content using the ICIS Excel Plug-In, and may input Licensed Content in the Permitted Applications, solely within the scope of the license granted in this Order Form and in order to make Licensed Content available to Authorized Users to undertake the relevant Use Case activities (as set out in Schedule A). Fair usage limits apply. Nothing in this Order Form permits use of Licensed Content in conjunction with generative AI technology, and Customer warrants that Permitted Applications do not incorporate generative AI functionality.

Retrieval Augmented Generation (RAG) Right. This paragraph applies only where Schedule A includes the DaaS with RAG right. If Schedule A does not include the DaaS with RAG, the rights in this paragraph do not apply. Where Schedule A includes the DaaS with RAG right, Customer may maintain a private, closed, generative AI application (a Permitted Application) for internal use by Authorized Users. LNRS agrees that Customer may, within the parameters of this license, store Licensed Content within its internal systems and may make such Licensed Content available for use as a retrieval augmented generation (RAG) data store in the context of the Permitted Application, provided that during the Term: (a) the Permitted Application is maintained and used in a closed hosted environment solely for internal use by Authorized Users in accordance with this Order Form, and (b) Licensed Content is not made available to a third party or used to train a large language model.

Ask ICIS. Where Customer receives access to Ask ICIS, Part F (Generative AI Product Terms) apply.

ICIS Energy Price History Terms. In relation to ICIS Hindsight and ICIS Foresight, Customer may retain ICIS historical data (“Historical Data”) during the Term for so long as Customer maintains a continuous subscription for the commodity to which the Historical Data relates. In relation to ICIS Insight, ICIS energy historical data (“Historical Data”) is licensed on a one-year rolling basis, and Customer agrees to delete Historical Data on a rolling basis so that Customer does not at any point during the Term hold Licensed Content relating to a date which is more than one year prior to the present (i.e. does not build up a store of Historical Data which extends more than one year into the past).

For and on behalf of Consip S.p.A.

PERMITTED ACTIVITIES

Each level includes the use cases for the preceding levels. Contracting includes all of the Base use cases, and Financial Trading includes the Contracting and Base use cases.

FINANCIAL TRADING.

Derivative Trading/Hedging: Authorized Users may use Licensed Content to formulate a trading and hedging strategy (typically trading SWAPS, futures and options).

CONTRACTING -

Invoicing/Settlement: Authorized Users may use Licensed Content to produce, check, and validate settlement of invoices or payments in connection with contracts.

Trading with Settlement: Authorized Users may use Licensed Content to conduct settlements in physical or cash settled contracts. This includes using Licensed Content to produce, check, and validate settlement of invoices or payments in connection with contracts. This excludes trading for hedging or risk management purposes.

BASE

Audit & Compliance: Authorized Users may use Licensed Content to ensure Customer adheres to regulatory and corporate guidelines.

Financial & Business Modelling: Authorized Users may use Licensed Content to construct a numerical representation of business scenarios to implement a financial and business model.

Financial Planning & Reporting: Authorized Users may use Licensed Content to formulate proprietary, in-house, internal budgets, undertake forecasting and target-setting, develop business plans, and to attribute a fair value to assets, liabilities and trades for such purposes

Internal Transfer Pricing: Authorized Users may use Licensed Content to determine a fair price for goods or services supplied between Customer and/or between Customer Affiliates.

Investment Strategy: Authorized Users may use Licensed Content to analyse its investment opportunities. This includes the evaluation of value, income, and risk of the intended investment.

Market Analysis: Authorized Users may use Licensed Content to identify key market trends, market capacity, market size, market share, commercial opportunities and competition analysis.

Operational Scheduling: Authorized Users may use Licensed Content to arrange, control and optimize workloads in a business process.

Risk Management: Authorized Users may use Licensed Content to identify, analyse and mitigate uncertainty in business, financial and legal decisions.

Valuations: Authorized Users may use Licensed Content to attribute a fair value to assets and liabilities, and to conduct mark-to-market analysis.

Trade Finance: Authorized Users may use Licensed Content to justify lending, issuing letters of credit, export credit, and insurance.

Negotiation: Authorized Users may use Licensed Content to conduct cost-price analysis, identify negotiation points, and justify contractual positions. Authorized Users may not share Licensed Content with contracting parties and may not use Licensed Content in documents such as invoices or contracts.

Benchmarking: Authorized Users may use Licensed Content to measure performance of teams, assets and businesses against market reported data points.
