

7. In this regard, the Supplier shall issue Sogei with an operating plan for approval, containing the time limits for installation, activation, configuration and the compliance check, which must be passed, within 30 days of delivery, unless otherwise specified by Sogei. Without prejudice to any modifications requested by Sogei to the time limits indicated in the operating plan, the time limits set forth in the operating plan approved by Sogei must be considered mandatory, under pain of the application of penalties.

8. Therefore, following successful checks, should Sogei determine that the Supplier has delivered goods that do not comply with the quantities and/or technical and qualitative characteristics indicated on the Purchase Order, Sogei will reserve the right to reject the delivered goods, without paying anything.

9. The goods must be delivered, within the time limits laid down hereinafter, on business days between 08:30 a.m. and 12:30 p.m. or between 1:30 p.m. and 4:30 p.m., excluding Saturdays, unless otherwise specified in the purchase order.

5. Delivery terms

1. The goods must be delivered, without fail, by the deadline stated on the order, under pain of the application of the penalties set forth in art. 7.

2. In case of early delivery, the Principal will be entitled not to accept the goods, or return them to the Supplier at the latter's expense, or keep them, while starting the payment period from the date of delivery and/or acceptance indicated on the purchase order.

3. The Principal reserves the right to draft a contract performance start report jointly with the Supplier.

Should specific circumstances prevent the correct execution of the services under this Order, the Principal will reserve the right to suspend them, indicating the relevant reasons and responsibilities. In the event of suspension, the provisions laid down in art. 107 of Italian Legislative Decree no. 50 of 18 April 2016 shall apply.

6. Installation, compliance check and acceptance of supplies (*this article also governs compliance checks for services used to supply the goods*)

1. Following delivery, the Supplier must install and activate the goods at the offices of Sogei and/or the Authority, within the deadlines laid down in the operating plan agreed with the Principal and set them up according to the procedures and time frames laid down in the technical specifications or in the said operating plan.

2. Once the installation, activation and configuration activities referred to in paragraph 1 above have been completed, compliance with the provisions of art. 102 of Italian Legislative Decree no. 50 of 18 April 2016 will be checked.

Also considering the provisions of paragraph 2, the Supplier hereby acknowledges that the installation and activation activities will therefore only be considered completed following the successful outcome of the compliance check referred to in paragraph 3. In case of IT goods, the system must be considered ready to use and activated on the Asset database through the use of the appropriate web procedure. In case of maintenance services, the compliance check will be conducted within the month following the reference quarter, unless otherwise specified on the purchase order. In this case, the compliance check will be repeated, without prejudice to the application of the relevant penalties referred to in the 'Penalties' section below. Any charges incurred by the Principal, along with any costs arising from the compliance check, will be met by the Company.

8. Should the second compliance check also be failed, the Principal, without prejudice to the application of penalties, will be entitled to terminate the contract, in accordance with both the 'Termination' article below and art. 1456 of the Italian Civil Code.

9. The Principal shall issue the compliance check certificate when it determines that the Supplier has properly provided the contractual services.

4. The maintenance also includes any service for the elimination of malfunctions. Lastly, for the purposes of this contract, malfunction is understood to mean any anomaly which, directly or indirectly, causes interruption to or less than complete availability of the user's service and, in any event, any discrepancy between the products and the relevant technical documentation and user manuals.
5. The maintenance service will be provided by the Company on the days indicated in the Technical Specifications and in accordance with the established Service Levels, under pain of the application of the penalties laid down in art. 8 below.
6. Should the elimination of the malfunction and/or stoppage require a time greater than that established or entail the transfer of the equipment to a place other than the premises of the Authority and/or Principal, the Company, subject to notification provided to the Principal, must replace the said items of equipment with others possessing the same technical and functional characteristics, without prejudice to the application of the penalties laid down in art. 8 below, until the actual replacement of the goods.

3. The Supplier hereby acknowledges that, should the compliance check be failed, for each day's delay with regard to the times established for the elimination of any defects, the Principal reserves the right to apply a penalty to the Supplier of 1 (one) thousandth of the total amount of the order for each day's delay accrued.
4. The Supplier hereby acknowledges that, for each day's delay in restoring the functionalities of the supply covered by the maintenance service or for each percentage point of the threshold value of the respective maintenance service level lost, the Principal reserves the right to apply a penalty to the Supplier of 1 (one) one thousandth of the total amount of the order for each day's delay accrued.
5. The Principal reserves the right to apply penalties up to a maximum amount of 10 (ten) per cent of the total amount of the purchase order. 1. The Supplier shall assume, vis-à-vis the Principal and/or Authority, full liability for all obligations arising from the purchase order.

 - ensure, irrespective of any approval or preliminary check by the Principal, that the products provided will be free from any obvious or hidden design or manufacturing defects and entirely compliant with the instructions of the Principal. Products that are faulty or, in any event, fail to comply with the established terms will be refused and made available to the Supplier;
 - ensure that the products maintain the technical characteristics required for the full warranty period, to be considered equal to the guaranteed maintenance period from the Supply Acceptance Date and, at the same time, ensure they work properly; the Principal may request prompt repair and/or free replacement for defects, faults and non-compliance detected during the warranty period. In any case, the Supplier will be debited the costs incurred by the Principal as a consequence of faults, defects

and non-compliance in the products supplied. None of the above affects the right to seek compensation for any further damages suffered.

3. In the event of breach, by the Company, of even one of the obligations laid down in the previous paragraphs, the Principal, without prejudice to the compensation for all damages, will be entitled to terminate this contract in accordance with art. 30 'Termination'.
