The System shall be used in accordance with the principles of individual responsibility and professional diligence, as provided for under articolo 1176, comma 2, del codice civile.

The Contracting Authority shall accept no liability for any loss of documents or data, corruption of files or documents, delays in entering data or documents and/or submitting the application, malfunction, loss or damage suffered by the economic operator as a result of:

- malfunctions affecting the equipment, connection systems or software used by the individual economic operator to connect to the System;
- use of the System by the economic operator in a manner inconsistent with the Request for quotation and the provisions of the Regole.

All activities and operations carried out through the System shall be recorded and attributed to the economic operator and shall constitute full evidence vis-à-vis the users of the System. Such System records shall be confidential and shall not be disclosed to third parties, save pursuant to a court order or a lawful request for access to documents under the applicable legislation.

All activities and operations carried out through the System shall be deemed to have taken place at the time and on the date shown in the System records. The System operating environment is synchronised with the national time scale referred to in decreto del Ministro dell’industria, del commercio e dell’artigianato 30 novembre 1993, n. 591, by means of the NTP protocol or a higher standard.

The use and operation of the System shall be governed by the Regole, which form an integral part of this Request for Quotation even though they are not physically attached hereto, and which may be consulted on [acquistinretepa.it](https://www.acquistinretepa.it) > chi siamo > come funziona at the following link: https://www.acquistinretepa.it/opencms/opencms/programma_comeFunziona_RegoleSistema.html.

The purchase, installation and configuration of hardware, software, digital signature certificates, the PEC mailbox or, in any event, a qualified electronic registered delivery service address, as well as the connections required for Internet access, shall be the sole responsibility and expense of the economic operator.

The System is normally accessible 24 hours a day, seven days a week. Access to the System may nevertheless be slowed, hindered or prevented by scheduled maintenance or technical issues, which shall, where possible, be notified to users with appropriate prior notice.

By registering and submitting its tender, the economic operator shall indemnify and hold harmless the MEF and Consip S.p.A., including in its capacity as Gestore del Sistema, against any loss, damage, cost or expense of whatsoever nature, including any legal costs, incurred by them and/or by third parties as a result of any breach of the rules contained in this Request for Quotation or its annexes, any incorrect or improper use of the System, or any breach of applicable law.
